Plan Corrections and/or omissions:

Note:

The Fire District Ordinance #1 can require changes after plan approval, further, all portions of the U.F.C. must be complied with and is the responsibility of the designer, contractor and owner, whether specifically stated by the plan review or not. Fire Dept. approval is not valid and no construction may be started until blue-prints reflecting the requirements herein are submitted and approved, or written documentation showing intent to comply with the requirements herein is accepted by the Fire District.

Required Inspections for New Construction

Frame Inspection

- To be made when rough plumbing, electrical, and HVAC are complete.

Fireplace Inspection

- To be made when damper and fire box are set masonry. If prefab insert – when fire place is framed in and flue pipe is set.
- 2nd Fireplace Inspection made when fireplace is completed, hearth built and spark arrestor is in place.

Sheetrock Inspection

- When the sheetrock is hung before it is taped and coated.

Fire Protection Devices Inspection

- When Sprinkler system or other alarm or systems are installed and ready for testing.

Smoke Detectors Inspection

- When smoke detectors are installed and operating

Final Inspection

- To be done when construction is completed, but before it is occupied.

Occupancy certificate will be issued after final inspection.
